

# SAN JOSE CLEAN ENERGY & ELECTRIC VEHICLES

**San José Clean Energy (SJCE) is a new electricity generation provider operated by the City of San José that powers homes and businesses with cleaner energy at lower rates than PG&E.**

**More than 60% of San José's greenhouse gas emissions come from transportation. SJCE is committed to expanding electric vehicle (EV) adoption to help reduce air pollution and preserve our planet for future generations.**

## ELECTRICITY RATES

EV drivers can get special time-of-use (TOU) electricity rates that incentivize charging during off-peak hours, like at night when you are sleeping, until 3:00 p.m.

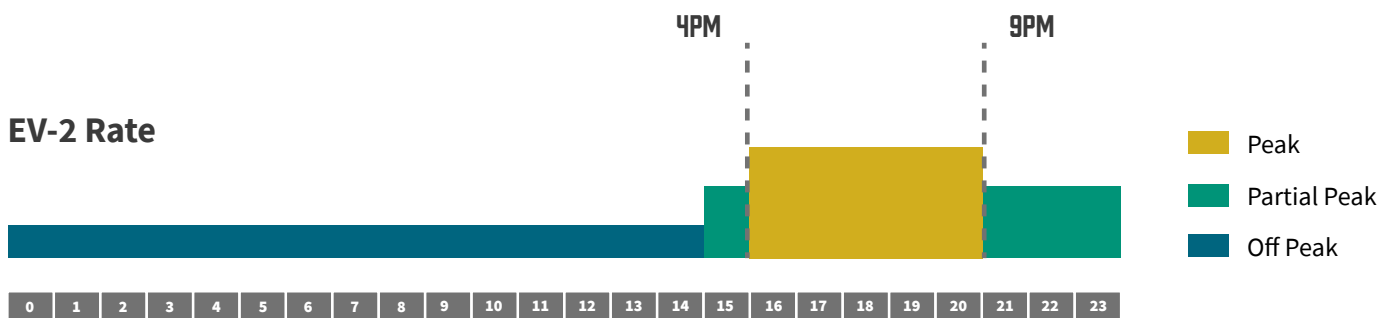

SJCE offers the same EV rate options as PG&E, but with 1% lower rates and more renewable energy.

Customers enroll for an EV rate through PG&E, and PG&E transmits that information to SJCE.

## NEW EV RATES

As of July 1, 2019, PG&E and SJCE discontinued EV-A and opened EV-2.

- In November 2019, all EV-A customers will be moved to EV-2, except solar net energy metering customers eligible for grandfathered treatment who can refuse transition to EV-2.
- EV-2 peak hours are from 4:00-9:00 p.m. every day, with higher rates in the summer than winter.

Note: TOU periods are year-round.

# SAVE MONEY & THE PLANET WITH AN EV

## BENEFITS

- **Save money!** EVs have lower fueling and lifetime maintenance costs, including battery replacement.
- **Drive past traffic!** Reduce your commute times with access to carpool lanes using a Clean Air Vehicle decal.
- **Easy parking!** Park for free at all City of San José parking meters and select ParkSJ garages.
- **Easy charging!** Access over 500 public charging stations.
- **Good for your health, good for the climate!** With no tailpipe emissions, EVs bring cleaner air to your neighborhood.
- **A fun ride!** EVs generally have faster acceleration and lower noise.

## REBATES AND INCENTIVES

With so many rebates and incentives, buying a new or used EV is often cheaper than a gas car. Max incentive amounts listed:

- **Federal Tax Credit:** \$7,500 on a new EV
- **Clean Vehicle Rebate Project:** \$2,500 on a new EV, includes leases
- **Clean Fuel Rebate:** \$800 on a new or used EV, includes leases

Additional incentives for low-income households:

- **Clean Vehicle Assistance Program:** \$5,000 on a new or used EV

- **Clean Cars for All:** \$9,500 on a new or used EV, includes leases, plus \$2,000 towards Level 2 charger equipment and installation
