

2021 PROSPECTIVE PRODUCT CONTENT LABEL ¹		
TotalGreen matches 100% of your electricity usage. In 2021, TotalGreen will be made up of the following new renewable resources averaged annually.		
Green-e® Energy Certified New ² Renewables in TotalGreen 2021		Generation Location
Solar	100%	California
Total Green-e® Energy Certified New Renewables	100%	California
<p>1. These figures reflect the renewables that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you before August 1 of next year in the form of a Historical Product Content Label the actual resource mix of the electricity you purchased.</p> <p>2. New Renewables come from generation facilities that first began commercial operation within the past 15 years.</p> <p>For comparison, the current average mix of resources supplying PG&E includes: Biomass and Biowaste (4%), Geothermal (4%), Renewable-Eligible Hydro (3%), Solar Electric (18%), Wind (10%), Nuclear (34%), Natural Gas (15%), Large Hydroelectric (13%), and Unspecified (0%). This resource mix was prepared in accordance with the California Energy Commission’s Power Source Disclosure Program (2018).</p> <p>The average home in the City of San José uses 423 kWh per month. Source: Pacific Gas & Electric (2020).</p> <p>For specific information about this product, please contact San José Clean Energy, (408) 535-4999, info@sanjosecleanenergy.org, www.SanJoseCleanEnergy.org.</p>
