

2021 PROSPECTIVE PRODUCT CONTENT LABEL ^{1,2}

TotalGreen matches 100% of your electricity usage. In 2021, TotalGreen will be made up of the following new renewable resources averaged annually.

Green-e® Energy Certified New ³ Renewables in TotalGreen 2021		Generation Location
Solar	100%	California
Total Green-e® Energy Certified New Renewables	100%	California

1. These figures reflect the renewables that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you before August 1 of next year in the form of a Historical Product Content Label the actual resource mix of the electricity you purchased.
2. In September 2020, customers received what should have been the 2020 Prospective Product Content Label but was labeled 2021. This is the actual 2021 Prospective Product Content Label.
3. New Renewables come from generation facilities that first began commercial operation within the past 15 years.

For comparison, the current average mix of resources supplying PG&E includes: Biomass and Biowaste (3%), Geothermal (2%), Renewable-Eligible Hydro (2%), Solar Electric (12%), Wind (9%), Nuclear (44%), Natural Gas (0%), Large Hydroelectric (27%), and Unspecified (0%). This resource mix was prepared in accordance with the California Energy Commission’s Power Source Disclosure Program (2019).

The average home in the City of San José uses 482 kWh per month. Source: Pacific Gas & Electric (2020).
