## Commercial Electric Rate Comparison, B-10S

	PG&E	SJCE GreenSource	SJCE TotalGreen
Generation Rate (\$/kWh)	\$0.16943	\$0.15394	\$0.16394
PG&E Delivery Rate (\$/kWh)	\$0.21774	\$0.21774	\$0.21774
PG&E PCIA/FF (\$/kWh)	\$0.00931	\$0.01091	\$0.01091
<b>Total Electricity Cost (\$/kWh)</b>	<b>\$0.39648</b>	<b>\$0.38259</b>	<b>\$0.39259</b>
<b>Average Monthly Bill (\$)</b>	<b>\$5,916.86</b>	<b>\$5,709.57</b>	<b>\$5,858.80</b>

Monthly usage: 14,923 kWh, monthly demand: 52 kW

### Rates as of June 1, 2024

This table compares electricity costs for an average commercial customer in the SJCE/PG&E service area (City of San José) with an average monthly demand of 52 kilowatts (kW) and an average monthly usage of 14,923 kWh kilowatt-hours (kWh). This is based on a representative 12-month billing history for all customers on B-10S rate schedules for PG&E's and SJCE's published rates as of June 1, 2024.

**Generation Rate** is the cost of creating electricity to power your business. The generation rate varies based on your energy provider and the resources included in your energy provider's generation supply.

**PG&E Delivery Rate** is a charge assessed by PG&E to deliver electricity to your business. The PG&E delivery rate depends on your electricity usage, but is charged equally to both SJCE and PG&E customers.

**PG&E PCIA/FF** represents the Power Charge Indifference Adjustment (PCIA) and the Franchise Fee surcharge (FF). The PCIA is a charge to ensure that both PG&E customers and those who have left PG&E service to purchase electricity from other providers pay the above market costs for generation resources that were procured by PG&E on their behalf. "Above market" refers to expenditures for electric generation resources that cannot be fully recovered through sales of these resources at current market prices. PG&E acts as a collection agent for the FF surcharge, which is levied by the California Public Utilities Commission on behalf of cities and counties in PG&E's service territory for all customers. PG&E bundled customers pay the PCIA and FF fees associated with the most currently available vintage year. PG&E charges SJCE customers the PCIA and FF fees based on the year that they transitioned to SJCE service. \*As reported to the California Energy Commission's Power Source Disclosure Program excluding voluntary unbundled renewable energy credits. PG&E data is subject to an independent audit and verification that will not be completed until October 1, 2024. SJCE's generation data is a forecast for 2023 and may be subject to change. Actual, audited 2023 generation data for both PG&E and SJCE will be reported to the California Energy Commission in 2024. The figures above may not sum up to 100 percent due to rounding.

\*\*San José Clean Energy elected to receive carbon-free resource allocations from PG&E, including nuclear, as San José Clean Energy customers already pay for it through the PG&E Power Charge Indifference Adjustment (PCIA).

\*\*\*Unspecified sources of power refers to electricity that is not traceable to a specific generating facility, such as electricity traded through open market transactions. Unspecified sources of power are typically a mix of all resource types, and may include renewables.
