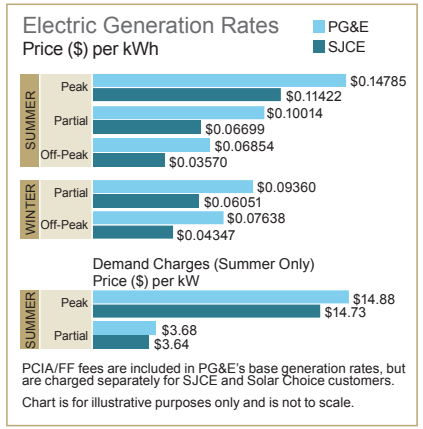
**Current rates as of May 1, 2020**

This table compares electricity costs for an average commercial customer in the SJCE/PG&E service area (City of San José) with an average monthly demand of 597 kilowatts (kW) and an average monthly usage of 257,522 kilowatt-hours (kWh). This is based on a representative 12-month billing history for all customers on E-19S rate schedules for PG&E's and SJCE's published rates as of May 1, 2020.

**Generation Rate** is the cost of creating electricity to power your business. The generation rate varies based on your energy provider and the resources included in your energy provider's generation supply.

**PG&E Delivery Rate** is a charge assessed by PG&E to deliver electricity to your business. The PG&E delivery rate depends on your electricity usage, but is charged equally to both SJCE and PG&E customers.

**PG&E PCIA/FF** represents the Power Charge Indifference Adjustment (PCIA) and the Franchise Fee surcharge (FF). The PCIA is a charge to recover PG&E's above-market costs for generation resources acquired prior to a customer's switch to a third-party electric generation provider. The PCIA also applies to PG&E customers that elect to take service under PG&E's optional Solar Choice program. PG&E acts as a collection agent for the Franchise Fee surcharge, which is levied by the California Public Utilities Commission (CPUC) on behalf of cities and counties in PG&E's service territory for all customers. The costs for resources included in the PCIA and FF surcharges are included in the generation rate for PG&E bundled service customers.



If this comparison does not address your specific rate, please visit PG&E online at **pge.com/cca** or call 866-743-0335. For information on SJCE's generation rates, please visit **SanJoseCleanEnergy.org** or call 833-432-2454.

PG&E data is subject to an independent audit and verification that will not be completed until October 1, 2020. SJCE's generation data is a forecast for 2019 and may be subject to change. Actual, audited 2019 generation data for both PG&E and SJCE will be reported to the California Energy Commission in 2020. The figures above may not sum up to 100 percent due to rounding.

**Unspecified sources of power refers to electricity that is not traceable to a specific generating facility, such as electricity traded through open market transactions. Unspecified sources of power are typically a mix of all resource types, and may include renewables.
