SAN JOSE CLEAN ENERGY
A Program of the City of San José

We support your power to choose

As part of our mutual commitment to support your energy choice, San José Clean Energy (SJCE) and Pacific Gas and Electric Company (PG&E) have partnered to provide you with a comparison of typical commercial electric rates, average monthly charges and generation portfolio contents.

If this comparison does not address your specific rate, please visit PG&E online at pge.com/cca or call 866-743-0335. For information on SJCE's generation rates, please visit SanJoseCleanEnergy.org or call 833-432-2454.

Understanding your energy choice

2019 Commercial Electric Rate Comparison, E-19SV*	PG&E	PG&E Solar Choice	SAN JOSE CLEAN ENERGY — GreenSource	SAN JOSE CLEAN ENERGY — TotalGreen
Generation Rate ($/kWh)	$0.10878	$0.08394	$0.08045	$0.08545
PG&E Delivery Rate ($/kWh)	$0.08007	$0.08007	$0.08007	$0.08007
PG&E PCIA/FF ($/kWh)	N/A	$0.02660	$0.02724	$0.02724
Total Electricity Cost ($/kWh)	$0.18885	$0.19061	$0.18776	$0.19276
Average Monthly Bill ($)	**$5,841.91**	**$5,896.35**	**$5,808.19**	**$5,962.86**

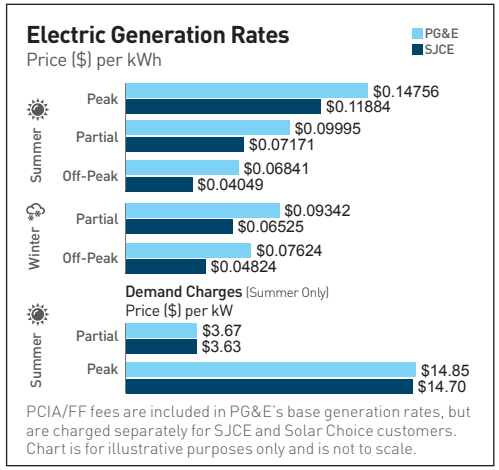
*This compares electricity costs for an average commercial customer in the SJCE/PG&E service area (City of San José) with an average monthly demand of 70 kW and an average monthly usage of 30,934 kilowatt-hours (kWh). This is based on a representative 12-month billing history for all customers on E-19SV rate schedules for PG&E's and SJCE's published rates as of September 1, 2019.

Generation Rate is the cost of creating electricity to power your business. The generation rate varies based on your energy provider and the resources included in your energy provider's generation supply.

PG&E Delivery Rate is a charge assessed by PG&E to deliver electricity to your business. The PG&E delivery rate depends on your electricity usage, but is charged equally to both SJCE and PG&E customers.

PG&E PCIA/FF represents the Power Charge Indifference Adjustment (PCIA) and the Franchise Fee surcharge (FF). The PCIA is a charge to recover PG&E's above-market costs for generation resources acquired prior to a customer's switch to a third-party electric generation provider. The PCIA also applies to PG&E customers that elect to take service under PG&E's optional Solar Choice program. PG&E acts as a collection agent for the Franchise Fee surcharge, which is levied by the California Public Utilities Commission (CPUC) on behalf of cities and counties in PG&E's service territory for all customers. The costs for resources included in the PCIA and FF surcharges are included in the generation rate for PG&E bundled service customers.

If this comparison does not address your specific rate, please visit PG&E online at pge.com/cca or call 866-743-0335. For information on SJCE's generation rates, please visit SanJoseCleanEnergy.org or call 833-432-2454.



PCIA/FF fees are included in PG&E's base generation rates, but are charged separately for SJCE and Solar Choice customers. Chart is for illustrative purposes only and is not to scale.

Electric Power Generation Mix*	PG&E	PG&E Solar Choice	SAN JOSE CLEAN ENERGY — GreenSource	SAN JOSE CLEAN ENERGY — TotalGreen
Specific Purchases	**Percent of Total Retail Sales (MWh)**			
Renewable	39%	100%	48%	100%
• Biomass & Biowaste	4%	0%	0%	0%
• Geothermal	4%	0%	0%	0%
• Eligible Hydroelectric	3%	0%	0%	0%
• Solar Electric	18%	100%	0%	23%
• Wind	10%	0%	48%	77%
Coal	0%	0%	0%	0%
Large Hydroelectric	13%	0%	52%	0%
Natural Gas	15%	0%	0%	0%
Nuclear	34%	0%	0%	0%
Other	0%	0%	0%	0%
Unspecified Sources of Power**	0%	0%	0%	0%
TOTAL	100%	100%	100%	100%

*As reported to the California Energy Commission's Power Source Disclosure Program excluding voluntary unbundled renewable energy credits. PG&E data is subject to an independent audit and verification that will not be completed until October 1, 2019. SJCE's generation data is a forecast for 2018 and may be subject to change. Actual 2018 generation data will be reported to the California Energy Commission in 2019. The figures above may not sum up to 100 percent due to rounding.

**Unspecified sources of power refers to electricity that is not traceable to a specific generating facility, such as electricity traded through open market transactions. Unspecified sources of power are typically a mix of all resource types, and may include renewables.
